

Pro Board Certified

Trench Rescue OPS & TECH Level (FLUSAR) Instructor: Lenny Collins

The Palm Beach State College Fire Academy will be holding a Trench Rescue class at the Belle Glade Campus

The public is invited to come view this complex training in action!

February 17 – 21, 2020

Tuesday–Thursday: 8:30 a.m. to 5:00 p.m.

Friday: 8:30 a.m. to 12:00 p.m.

Trench rescues can be technically challenging due to the environment in which they occur. This unique program stresses teamwork and covers the responsibilities to identify soil types and characteristics; types of protective systems; performing a risk/benefit analysis; using an incident management system; monitoring the atmosphere and soil; constructing a protective shielding system with wood shores in a straight trench; constructing a protective system in an intersecting trench; creating safe access points; patient assessment and extrication; preserving evidence for evaluation; dismantling the protective systems; and other safety procedures, equipment techniques and personnel training necessary to operate at a trench rescue emergency.
