

## Harmful Algal Bloom Study

- Principal Investigator: Adam M Schaefer, M.P.H.
- The research is being conducted by scientists at Florida Atlantic University's Harbor Branch Oceanographic Institute and is designed to fill an important gap in our understanding of the long-term impacts of harmful algal blooms (HABS) on environmental and human health. Follow-up sampling during bloom and non-bloom periods will be conducted.
- Individuals must be 18 years of age or older to participate and willing to participate in multiple sampling visits. Participation will require no more than 20 minutes. Participants will be reimbursed for their time.

In addition:

- February 28<sup>th</sup>, 10:00 am – 2:00 pm
- Study Location: Florida Department of Health in Clewiston, 1100 South Olympia Avenue, Clewiston, FL 33440
- The investigators are required to adhere to the IRB approved protocol. Therefore, we are not able to accommodate individual requests for testing or to provide individual results at this time.
- For more questions please contact the study team. (aschaef3@fau.edu)
