PUBLIC SURVEY: Available for All Stakeholder Groups

In addition to the public meetings, an online public survey has been developed to collect feedback from:

- **General Public and Elected Officials** – to understand residents' experiences and priorities for transportation.
- **Business Community** – to gather input on how the transportation system affects operations, workforce, and access.
- **Technical Advisors** – to provide expert insights on infrastructure, performance measures, and future innovations.

The [surveys](https://www.pbcmoves.com) are available now at [PBCMoves.com](https://www.pbcmoves.com) under contact and will be open through October 18, 2025. Responses from the surveys will inform CTMP's strengths and opportunities analysis and help shape strategies for a safe, efficient, and resilient transportation network.

ABOUT THE CTMP

The Countywide Transportation Master Plan will establish a shared vision for mobility across all modes — driving, walking, biking, transit, freight, and emerging technologies. It is designed to address near-term needs and prepare Palm Beach County for growth through 2050.

“Public input is vital to building a plan that reflects the needs of residents, businesses and communities,” said Palm Beach County Administrator Joseph Abruzzo. “These meetings and the survey give everyone a voice in shaping the County’s transportation future.”
