Telehealth Certification

Healthcare technology is constantly advancing, and the future of telehealth is expanding beyond expectations.

This 20-hour, fully online, telehealth certification course provides the essential knowledge to deliver skilled telehealth services with competence and care. The program addresses:

- **Telehealth platforms and models for practice**
- **Evidence-based telehealth technology**
- **Quality improvement measures**
- **Regulation, policy and reimbursement**
- **Telehealth interprofessional practice and specialized populations**
- **Telehealth and the future**

Experts will focus on topics related to health equity, improving access, health disparities, and interprofessional practice with specific populations in relationship to the application and implementation of various telehealth platforms. Participants will have the opportunity to engage with each other and experts in the translation of telehealth technology into practice.

The course is open to the general public. Following completion of the course, participants will have the knowledge needed to build out telehealth services. The course provides 20 CEU hours.
