

TRAINING OPPORTUNITY

“Recovery Navigator” is a term for a new role that allows qualified peers to mentor and monitor individuals in recovery from substance use disorders by utilizing REC-CAP Assessment (an evidence based tool) and REC-Connect Recovery Planning Tool; both components of an evidence-based intervention developed by Dr. David Best.

Guided by the REC-CAP assessment, the Navigator’s role is to foster a client’s development of concrete goals to overcome identified barriers and connect with pro-social networks within the community at-large.

Recovery Capital is defined as *“the breadth and depth of internal and external resources that can be drawn upon to initiate and sustain recovery from AOD [alcohol and other drug] problems.”*

As a Recovery Navigator, you will be an independent contractor for the Recovery Outcomes Institute, Inc. Compensation is \$100/month per active case and \$25.00 to conduct the initial baseline assessment. Each client who successful completes 6 month service delivery cycle yields \$625.00 in gross Navigator earnings. Navigator responsibilities include;

- Conducting REC CAP baseline and quarterly assessments
- Utilizing motivational interviewing principals, and node-link mapping skills to forge a peer alliance
- Mentoring clients to conduct SMART goal to overcome barriers identified through assessment
- Linking clients to community resources to assist them in achieving their goals
- Participating in case review sessions with both clinical and peer supervisors

Recovery Navigators may maintain a maximum active case load of eighteen clients, generating gross compensation of between \$20,000.00- \$25,000.00 per annum. As individuals at this stage of recovery are typically employed full time during the days they require weekly, bi-weekly, and monthly sessions to take place early evenings, and weekends making this an ideal opportunity for persons with lived experience who also hold any of the following credentials; CRPS-A, CRPS-F, CRPS-V, MCAP, CAP, CRSS and or CAC.

The Recovery Outcomes Institute (ROI) is a non-profit organization committed to funding research, building infrastructure, training, and collecting data that improves outcomes for the client, their families and the community.

The REC-CAP Assessment & REC-Connect is an evidence-based intervention developed by Dr. David Best, Sheffield-Hallam University, which provides a finite, measurable recovery plan coupled with accurate and predictive assessment of resilience.

Individuals interested in becoming a Recovery Navigator in Training must meet the following criteria:

- 18 years old
- Attestation of 2 years sustained recovery
- Level 2 background clearance
- Peer Specialist Credential*
- ROI Training Curriculum
- RNS Community of Practice (CoP) CEUs

* Provided other eligibility criteria are met, Navigators may achieve their peer credential while engaging in Recovery Navigational Support (RNS) service delivery under supervision.

Those who complete the training become Certified Recovery Navigators in Training and are ready to begin guiding their clients through a process of REC-CAP assessment and goal setting that may stretch far beyond the traditional confines of the continuum of care.

This position offers opportunity for growth, an opportunity to make a difference in the lives of many, and flexible work hours.

Begin the process of joining our growing community today by registering for the upcoming free NAADAC accredited two-day training held on January 8th & 9th 2018.
